Education/Certifications

Florida State University - Bachelors of Science Information Technology; STEM Entrepreneurship Minor

May 2028

Anthropic's Claude 101 - June 2026

Google's AI Professional Certificate - March 2026

Google's Foundations in Project Management (Certification) - January 2024

Experience

STARS Computing Core

Data Analyst

May 2026 — Present

- Managed end-to-end data analytics projects utilizing Power BI to visualize workforce trends and alumni outcomes, translating raw organizational data into actionable insights that informed strategic decision-making for nonprofit leadership.
- Built an AI-powered alumni data enrichment agent leveraging LLMs and Python-based automation that reduced a full semester of manual research to a matter of hours, demonstrating applied proficiency in modern AI tooling across a 2,500+ record dataset

Florida State University/IT Services

Emerging Technology in Web Design Internship

January 2026 — May 2026

- Collaborated with IT and university stakeholders to evaluate new technologies and translate institutional needs into digital solutions.
- Manage website content through front-end development, ensuring pages are functional, accessible, and visually consistent.
- Developed a faculty request portal integrating interactive 3D model visualization to streamline submission and production workflows for 3D printing services.

Florida State University/IT Services

Project Manager Internship

August 2024 – May 2025

- Worked on a team of 7 managing projects throughout FSUs Information Technology Services Department
- Specialized in the Smartsheet platform for Project Management creating report forms and project timeline dashboards.
- Coordinated communication between technical and non-technical stakeholders to ensure project alignment and set project parameters

Leon County Management Information Systems

Web Development Internship

August 2023 – Dec 2023

- Worked on the MIS team with the DNN and SiteImprove platforms to update the current Leon County Website.
- Focused on content management tasks such as using both HTML and CSS to update the website and remove dead links from the webpage

Technical Skills

Languages & Frameworks:

Python, Javascript, TypeScript, MySQL, C++; React, React-Native, Expo, Supabase, PowerBI

Systems:

Windows, MacOS

Projects

SprintLink, Lead Developer

December 2025 — Present

- Founded and developed SprintLink, building and maintaining web-based solutions using modern front-end technologies while managing the full product lifecycle from concept to deployment
- Built responsive mobile application using HTML, CSS, Typescript, Firebase and React-Native focusing on performance, accessibility, and clean UI design

Hottake, Front-End Developer

December 2025 — Present

- Collaborated with a team of developers to implement and improve front-end features using React-Native and Expo ensuring responsive design, usability, and consistent performance across devices
- Assisted with debugging, UI testing, and iterative design improvements to enhance front-end performance and usability.
